Presentation Brothers Statement in response to the publication of the Scoping Inquiry Report

"The Presentation Brothers have fully co-operated with the Scoping Inquiry and will continue to co-operate. We acknowledge the impact, and the hurt and pain caused to victims of abuse. We condemn and apologise for what happened. We give our sympathy, support and co-operation to all the victims. While we acknowledge that it can never undo the damage caused, a broad range of support is available to support victims including access to funded counselling and therapeutic services as well as pastoral and restorative justice processes. We encourage anyone in need of support to contact us to avail of these services."
